

# 601 Fiber Wall Enclosure >

The 601 Fiber series wall mount system interface products are compact units for optical fiber. The ST® and Duplex SC versions have a capacity for up to either 6, 8, 12 or 24 ports.

The 601 fiber interface units are made of white rugged plastic and have a low profile, yet provide the proper internal fiber management to ensure the integrity of the optical network. Sufficient storage room for the fiber service loop makes installation easy. There is also provision for a user supplied seal for added security. The unit is compatible for splicing and direct terminations. The splice holders have been designed to accept up to 8 fusion splice protectors or mechanical splices.

The identification card and label supplied in the accessory kit, enables the user to trace their fiber throughout the system. The accessory kit contains two cable ties, one identification card, one label and label holder and two screws for mounting the adapter plate.

## FEATURES AND ADVANTAGES

Compact unit. 184 x 127 x 38mm

Up to 24 Ports

Accepts ST®, Duplex SC, MTP, OptoclipII & MTRJ

Multimode & Singlemode configuration

Accepts up to 8 fusion or mechanical splices

Management

Label Holder

ID card

Cable tie feature

Top, bottom and rear access

Lockable

Rugged white plastic
